

# Resell Data Backup

April

## Protecting Data

Part of your clients backup and disaster recovery planning must be to ensure that a copy of their critical business data is kept safe and secure offsite. Gigasoft enables your business clients to have a comprehensive enterprise level disaster recovery solution in place for the minimum of expense and effort.

## Protect your clients

At Gigasoft we understand the importance of protecting data, we offer a secure online backup solution specifically for businesses & schools that need to store their valuable data offsite at reasonable rates. Cost is usually a predominant factor and with this in mind we have formulated a very cost effective solution, enabling your clients to have a comprehensive enterprise level disaster recovery solution in place for the minimum of expense and effort.

## Extra monthly revenue created easily

It's very easy to generate extra revenue every month, If your client is currently using an old fashioned time consuming tape or disc backup solution all you need do is recommend Gigasoft as an alternative data backup service, we will do the rest, we will even assist you with the marketing and brand it for your company. All you have to do is sit back and take the generous commission.

## Why recommend Gigasoft

As an IT support company you want to be able to help your clients in their darkest hour. Following a disaster you will be able to get your business clients back up and running quickly & efficiently reducing their stress & loss of earnings to a minimum.
